

EZDraw 595SB

Wire Drawing Lubricant

Description

EZDraw 595 is a free flowing lubricant formulated with specialized fatty acids reacted with soluble alkalis. It is a versatile, high performance lubricant, suitable for a variety of applications using high-speed equipment. EZDraw 595 is manufactured under controlled conditions to assure chemical consistency and moisture content.

Applications

EZDraw 595 is a versatile, multi-purpose lubricant that may be utilized in many applications:

- Low carbon and high carbon steel
- Mechanically descaled or acid cleaned and coated wire
- Borax, Phosphate, Lime or Formulated pre-coats
- Stainless steel wire

Operating Parameters

- Up to 15 holes
- A wide variety of rod breakdown and finished wire sizes
- Speeds compatible with the newest machine capabilities and technologies
- Combining high speed, great die life and excellent cleanability

Properties

Properties	
Appearance	Off-white free-flowing, powder
Solubility	Completely water-soluble
% Moisture	1.0 - 2.0 (typical)
Assay	Soluble stearates, borax, nitrites, and other additives
Softening Point °C	>220

Packaging

EZDraw 595 is available in 280 lbs fiber drums or 1500 lbs supersacks.
