

EZDraw JWAX

Semi-Synthetic Galvanize Lubricants

Description

EZDraw JWAX is a highly concentrated semi-synthetic galvanized wire lubricant containing specialty lubricity additives, emulsifiers, inhibitors, and biocide. It is designed to offer optimum performance on all galvanizing lines and all wire specifications. A great package and great protection. EZDraw JWAX keeps your equipment and wire clean by leaving a dry film, so you are not picking up dust.

Applications

EZDraw JWAX is specifically formulated to be:

- Superior galvanized wire lubricant/protective coating
- Light lubricant coating in place of wax on a hot dip galvanizing lines
- Rolling steel or galvanized steel bars or wire
- Anticorrosion coating in place of wax on a hot dip galvanizing lines
- Excellent stability in all water conditions

Operating Parameters

- No foaming
- Very low consumption
- Excellent oxidation inhibiting properties
- Forms a stable emulsions in all types of water
- Excellent lubricity properties
- Resistant to microbial degradation

Properties

Wax replacement	100:1 to 150:1
Rolling	5:1 to 20:1
Weaving lubricant	10:1 to 20:1
pH range	8.0 to 10.0
Temperature	200° F Maximum

Packaging

EZDraw JWAX is available in 5-gallon buckets, 55-gallon drums and 275-gallon totes.
