

## EZDraw PHU

### Mild Alkaline pH Adjuster

## Description

EZDraw PHU is a mild alkaline neutralizer and buffering compound for lubricant emulsion systems.

## Applications

EZDraw PHU is used to increase the pH of solutions, increase detergency, stabilize the emulsion system and help to create a pH buffered system.

## Operating Parameters

The amount to be used is dependent on the pH of the system prior to addition and the type of contaminate lowering the pH. Additions of 1 pint of EZdraw PHU to 100 gallons of solution normally raises the pH 0.5 unit.

## Properties

Properties	
Appearance	Water white to pale yellow liquid
Solubility	Water soluble
Density	Approximately 8.5 lbs/gal

## Packaging

EZDraw PHU is available in 5 gallon pails and 55 gallon plastic drums.
