

EZDraw WV

Semi-Synthetic Weaving Lubricant

Description

EZDraw WV is a highly concentrated semi-synthetic fence weaving lubricant containing specialty lubricity additives, emulsifiers, inhibitors, and biocide. It is designed to offer optimum performance on all weaving machines and chain link wire specifications. EZDraw WV leaves your fabric and machines clean. It also cleans off very easy with the use of EZDraw CL1.

Applications

EZDraw WV is specifically formulated to be:

- Superior fence weaving lubricant
- Light lubricant coating in place of wax on a hot dip galvanizes line
- Rolling steel or galvanized steel bars or wire
- Anticorrosion coating in place of wax on a hot dip galvanizes line

Operating Parameters

Parameters	
Weaving lubricant	10:1 to 20:1
Rolling	5:1 to 20:1
pH range	8.0 to 10.0
Temperature	200° F Maximum

Properties

- No foaming
- Very low consumption
- Excellent oxidation inhibiting properties
- Forms a stable emulsions in all types of water
- Excellent lubricity properties
- Resistant to microbial degradation

Packaging

EZDraw WV is available in 40 lbs buckets, 425 lbs drums, 2100 lbs totes or tankers
