

## EZFeed SC

## Vanishing Oil

### Description

EZFeed SC is a special blend of low viscosity oils that is formulated for use on mild deforming and straighten and cut operations, leaving a very light lubricant film. In addition, EZFeed SC also aids in extending tool life, reduces barber pulling, and aids welding of finished products. EZFeed SC is non-reactive to all metals and will evaporate leaving a very clean, dry and lubricated wire surface, while helping to reduce rust and oxidation.

### Applications

- Stranding lube for ferrous, non-ferrous or galvanized wire
- Coiling lube for welding wire
- Roll forming light gauge steel
- Applied before straighten and cut operations
- Pay-off aid for tightly spooled wire

### Operating Parameters

EZFeed SC is used in its "as received" form either by flooding, submersing, wiping, drip system or spraying.

### Properties

- Low viscosity
- Non-staining
- No sulfur or chlorine
- Complete evaporation

### Packaging

EZFeed SC is available in 5 gallon pails, 55 gallon drums and 275 gallon totes.
