

EZFeed Stranding Oils

EZFeed AL30

Is a special blend of low viscosity oils that is formulated for use on aluminum for stranding, compacting, mild deforming, packaging, and feed operations leaving a very light lubricant film that also prevents short term oxidation. EZFeed AL30 is non-reactive to all metals and will evaporate leaving a very clean and dry wire surface.

EZFeed CS40

Is a special blend of low viscosity oils that is formulated for use on carbon steel for stranding, compacting, mild deforming, packaging, and feed operations leaving a very light lubricant film that also prevents short term oxidation and aids in welding. EZFeed CS40 is non-reactive to all metals and will evaporate leaving a very clean and dry wire surface.

EZFeed SS50

Is a special blend of low viscosity oils that is formulated for use on stainless steel for stranding, compacting, mild deforming, packaging, and feed operations leaving a very light lubricant film that also prevents short term oxidation. EZFeed SS50 is non-reactive to all metals and will evaporate leaving a very clean and dry wire surface.
